

ENERGEX - PYLONS - AUSTRALIA

Recoating of 4 Energex Towers with the ZINGA stand alone system in June 2007.
Surface preparation was done by Zintec Corrosion solution and the application by Temco.
Very easy application, it took only two days for one tower.
A total of 1290 Kg of ZINGA was used.

This is the Energex Tower No 1278,
located at Woongoolba, halfway between
Brisbane and the Gold Coast
(SE Queensland).

The other three towers are located on
Russell and North Stradbroke Islands.

System:

ZINGA 2 x 90 µm
