

DE GRAEVE SHIPYARDS - BELGIUM

De Graeve Schipyards was one of the last well-known shipyards in Belgium. This company was situated in the port of Zeebrugge. In 1980 they had their first experience with ZINGA and they have continued to use this system ever since, not only for repair and maintenance, but also for new constructions of over 30 vessels. These vessels, especially fishing boats, are navigating in the North Sea, around Iceland and in the Atlantic Ocean.

Zingametall received a testimonial from De Graeve, dated 04/09/1989, expressing their satisfaction about ZINGA and including a brief application description.

TO WHOM IT MAY CONCERN

We hereby confirm that the shipbuilders L. DE GRAEVE have been using the ZINGA products for several years by nor (appr. 10 yaers) for the inner and outside covering of the metal surfaces of the vessels with great satisfaction.

The most common work procedure is the following :
after sandblasting : S.A. E. 2,5

- 1.Trunk below the sea-level :
 - 2 layers of ZINGA
 - One layer of sealer : epoxy 2 components
 - 1 finishing layer (chlorinated rubber or P.V.C. paint)
- 2.Trunk above the sea-level :
 - 2 layers of ZINGA
 - 1 layer of sealer (micaceous-iron)
 - 1 finishing layer (chlorinated rubber or P.V.C. paint)
- 3.The inner of the ship and the dekk
 - 1 layer of ZINGA
 - 1 layer of sealer
 - 2 layers of 1 compinent
 - a finishing layer
